

2025 Annual Implementation Plan

Starting Strong in the Heart of the City - Academic Achievement

We prioritise developing strong literacy and numeracy skills. By building foundational skills early, we set students up for success across all subjects as they progress through school.

Our 2025 targets in English and Maths are

- 80% of students achieving a C or better
- 50% of students achieving an A or B

Key strategies:

- Learning walls as a third teacher in the room.
- Feedback through teacher conferencing, writing scale to identify next steps to improve and learning tree to self-evaluate and identify learning goals.
- Monitoring and tracking student progress through collaborative planning, identifying marker students and termly data meetings.

Maximising student engagement, strengthening staff wellbeing and building a stronger community

We maintain high expectations for behaviour and attendance because we know that being present and engaged is key to academic success. By fostering a supportive and focused learning environment, our students can achieve their best.

Key strategies:

- Building partnerships beyond the school to enrich learning and wellbeing outcomes for students.
- Strengthening community connections and relationships by facilitating parents/carers involvement in the learning of their children.
- School wide programs: PAUSE, PBL and Respectful Relationships.
- Communicating and connecting with families – dojo, newsletters, Facebook, parent-teacher meetings, events and celebrations.

Creating an inclusive culture in the heart of the city

We believe every child has the right to succeed. Our inclusive teaching practices ensure all students, regardless of their background or abilities, have equal opportunities to achieve and succeed.

Key strategies:

- Planning learning experiences that include knowledge of individual students' abilities and strengths.
- Providing differentiated teaching to accommodate the learning needs of all students in English and Maths.
- Implementing specialised, intensive, individualised teaching and adjustments for students.

BELONG ~ LEARN ~ SUCCEED

We are committed to providing our students with the best opportunities to succeed. Our explicit focus on literacy and numeracy aims to ensure every student reaches their full potential through high standards for behaviour, engagement and academic success.
